

***The economic and financial losses caused by natural disasters have increased substantially over the last decades.***

***It is expected that the frequency and the severity of weather related events will further increase due to climate change.***

# Why and How

## do insurance approaches play a key role in climate change?

Developing Climate Insurance markets around the globe through equity/debt investments and technical assistance to facilitate healthy development

# The objective:

To facilitate the adaptation to climate change  
**by improving access to and the use of  
climate insurance** solutions in developing  
countries.

## Solutions offering:

**Financing to qualified insurance, re-insurance and financial companies** that offer or introduce insurance solutions against:

- extreme weather events
- natural catastrophes
- agricultural insurance

**Technical assistance, e.g., for product design and development**
